Adapter Twin Connecting Hose

Code: AL-327 GST: 18% Brand: AVAIN LABS

AVAIN LABS® Adapter Twin Connecting Hose

The AVAIN LABS® Adapter Twin Connecting Hose is a laboratory gas-flow accessory designed for convenient and reliable connection of hoses for the controlled flow of inert gases. It is suitable for laboratory setups where a single connection point needs to be connected to two hose lines for efficient gas distribution.

The adapter features one cone connection and two hose connections positioned at 180° from one another, providing a practical straight-through configuration for connecting inert gas lines. Its simple design allows easy integration into laboratory gas-flow assemblies and experimental setups.

Designed for laboratory applications, the AVAIN LABS® Twin Connecting Hose Adapter is suitable for use with inert gas systems where secure and convenient hose connections are required.

Key Features

- Twin connecting hose adapter for laboratory applications
- One cone connection
- Two hose connections
- Hose connections positioned at 180° from one another
- Designed for inert gas flow
- Convenient for laboratory gas-line connections
- Simple and practical configuration
- Suitable for laboratory and research applications

Applications

The AVAIN LABS® Adapter Twin Connecting Hose is suitable for laboratory inert gas flow systems, gas distribution setups, research laboratories, chemical laboratories, analytical applications, and experimental gas-flow assemblies where two hose connections are required from a common connection point.
