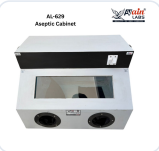
Aseptic Cabinet AL-629

Code: AL-629 GST: 18% Brand: AVAIN LABS



AVAIN LABS® Aseptic Cabinet AL-629

The AVAIN LABS® Aseptic Cabinet AL-629 is a high-quality laboratory enclosure designed to provide a clean, sterile, and contamination-free working environment for sensitive procedures. Ideal for microbiology, pharmaceutical, and research laboratories, this aseptic cabinet ensures safe handling of samples, cultures, and instruments.

Constructed with fully transparent acrylic sheet front and side doors, the cabinet offers complete visibility, allowing users to perform precise operations without obstruction. The unit is equipped with a 12-inch germicidal ultraviolet (UV) tube for effective sterilization, eliminating airborne and surface contaminants. Additionally, a 12-inch fluorescent tube provides bright white illumination for clear visibility during work.

The cabinet includes all necessary electrical components such as choke, ballast, starter, switches, and a main power lead with plug for easy installation and operation. For enhanced usability and protection, the unit is designed with two arm insertion holes fitted with rings and sieves, ensuring controlled access while maintaining aseptic conditions.

Key Features & Specifications:

- Transparent acrylic front and side doors for full visibility
- 12” germicidal UV tube for effective sterilization
- 12” fluorescent tube for bright working illumination
- Complete electrical setup with choke, ballast, starter, and switches
- Main power lead and plug included for easy operation
- Two arm insertion ports with rings and sieves for safe handling
- Designed to maintain aseptic, contamination-free environment
- Ideal for microbiology, pharmaceutical, and research laboratories

The AVAIN LABS® Aseptic Cabinet AL-629 is a dependable solution for laboratories requiring sterile working conditions, combining visibility, safety, and efficiency in one compact unit.
