Caps, PP Screw Cap with Pouring Ring for Laboratory Reagent BOTTLE

Code: W-3785 GST: 18% Brand: AVAIN LABS

AVAIN LABS® Caps, PP Screw Cap with Pouring Ring for Laboratory Reagent BOTTLE

The AVAIN LABS® PP Screw Cap with Pouring Ring for Laboratory Reagent Bottle is a durable laboratory accessory designed to provide a secure closure and convenient pouring solution for compatible reagent bottles. Manufactured from high-grade polypropylene (PP), the cap is suitable for laboratory environments and is designed for repeated use.

The integrated pouring ring helps facilitate controlled pouring and reduces unwanted drips when dispensing liquids from compatible laboratory reagent bottles. The cap is also autoclavable up to 140°C, making it suitable for applications requiring steam sterilization within the specified conditions.

Key Features

- PP screw cap with pouring ring for laboratory reagent bottles
- Made from high-grade polypropylene
- Autoclavable up to 140°C
- Designed for secure closure of compatible reagent bottles
- Integrated pouring ring for convenient liquid dispensing
- Suitable for repeated laboratory use
- Durable construction for laboratory environments
- Suitable for compatible chemical and reagent storage applications

High-Grade Polypropylene Construction

The AVAIN LABS® screw cap is manufactured from high-grade polypropylene (PP), a commonly used material for laboratory accessories due to its durability and resistance to many laboratory chemicals.

Its polypropylene construction makes the cap suitable for use in a variety of laboratory and scientific environments, subject to compatibility with the contents and operating conditions.

Convenient Pouring Ring

The integrated pouring ring is designed to make liquid dispensing from compatible reagent bottles more convenient. It helps guide the liquid during pouring and can assist in reducing spills and drips during routine laboratory handling.

Autoclavable Laboratory Cap

The AVAIN LABS® PP Screw Cap is autoclavable up to 140°C, making it suitable for laboratory applications where compatible components require steam sterilization. Always verify compatibility of the complete bottle assembly and contents with the selected sterilization procedure.

Applications

Suitable for use with compatible laboratory reagent bottles in:

- Chemistry laboratories
- School and college laboratories
- Research laboratories
- Pharmaceutical laboratories
- Scientific institutions
- Reagent storage applications
- Laboratory liquid handling
- Educational laboratory setups

Product Name

AVAIN LABS® PP Screw Cap with Pouring Ring for Laboratory Reagent Bottle

Material

High-Grade Polypropylene (PP)

Autoclavability
