Ball Mill

Code: AL-636A GST: 18% Brand: AVAIN LABS

AVAIN LABS® Ball Mill

The Avain Labs Ball Mill is a precision-engineered grinding solution designed for efficient size reduction and fine powder production. Manufactured using high-quality, proven components and advanced technology, this ball mill delivers consistent and reliable performance across laboratory and industrial applications.

Built with durability and accuracy in mind, the AL-636 Ball Mill is widely used for grinding materials into fine powders, making it ideal for mineral dressing processes, paints, pigments, chemicals, and research laboratories. Its robust mild steel construction ensures long service life, while the user-friendly design allows smooth operation and minimal maintenance.

This versatile machine is available in multiple capacities including 1 kg, 2 kg, 5 kg, 10 kg, and 25 kg, making it suitable for both small-scale lab testing and larger industrial production needs.

You are requested to select the appropriate range prior to placing your order.

Key Features

- High efficiency grinding for ultra-fine powder output
- Manufactured with premium-grade components
- Advanced design for consistent performance
- Suitable for laboratory and industrial applications
- Strong and durable mild steel construction
- Easy operation with low maintenance

Specifications

Cat No	Description

Available models (7)

Cat. No.	Model / Size	HSN
AL-636A	Ball mill 1 kg	
AL-636B	Ball mill 1 kg heavy	
AL-636C	Ball mill 2 kg	
AL-636D	Ball mill 2 kg heavy	
AL-636E	Ball mill 5 kg	
AL-636F	Ball mill 10 kg	
AL-636G	Ball mill 25 kg
