Culture Tubes, Flat Bottom Amber

Code: AL-274-2-A GST: 18% Brand: AVAIN LABS

AVAIN LABS® Culture Tubes, Flat Bottom Amber

The AVAIN LABS® Culture Tubes, Flat Bottom Amber are high-quality laboratory glassware designed for the safe handling, storage, preparation, and culturing of laboratory samples. Manufactured from premium Borosilicate Glass 3.3, these culture tubes offer excellent durability and reliability for a wide range of laboratory applications.

The amber-coloured glass construction helps provide protection for light-sensitive samples, making these culture tubes suitable for applications where exposure to light may affect the stored material. The tubes are manufactured with uniform wall thickness, helping ensure consistent strength and dependable performance during routine laboratory use.

Each AVAIN LABS® Amber Culture Tube features clear and durable printing in matt-finish white enamel, providing improved visibility and easy identification. The high-quality construction is designed to support secure sample handling and storage.

The culture tubes are supplied with a PP (Polypropylene) screw cap and liner, providing a secure and leakproof closure for reliable sample storage and transportation. The flat-bottom design allows the tubes to stand upright conveniently, making them suitable for laboratory benches and storage applications.

The AVAIN LABS® Culture Tubes, Flat Bottom Amber are ideal for use in microbiology laboratories, biotechnology laboratories, pharmaceutical laboratories, clinical and diagnostic laboratories, educational institutions, and research facilities.

Key Features

- Made from high-quality Borosilicate Glass 3.3
- Amber-coloured glass suitable for handling light-sensitive samples
- Flat-bottom design for convenient upright placement
- Uniform wall thickness for consistent strength and durability
- Clear printing in matt-finish white colour enamel
- Designed for secure and reliable laboratory use
- Leakproof construction
- Supplied with PP screw cap and liner
- Suitable for sample storage, handling, preparation, and culture applications
- Suitable for routine laboratory and research use

Applications

The AVAIN LABS® Culture Tubes, Flat Bottom Amber are suitable for:

- Microbiological culture applications
- Sample storage
- Storage of light-sensitive materials
- Laboratory sample preparation
- Biological and chemical sample handling
- Pharmaceutical laboratory applications
- Biotechnology and life science research
- Clinical and diagnostic laboratories
- Educational and research institutions

Why Choose AVAIN LABS® Culture Tubes, Flat Bottom Amber?

AVAIN LABS® Culture Tubes are manufactured using Borosilicate Glass 3.3 to provide dependable laboratory performance. The combination of amber glass, uniform wall thickness, matt-finish white enamel printing, and a PP screw cap with liner makes these tubes a practical choice for laboratories requiring secure and leakproof sample handling and storage.

The flat-bottom design provides additional convenience by allowing the tubes to stand upright, while the amber construction makes them particularly suitable for applications involving samples that require protection from light.
