DIGITAL WATER & SOIL ANALYSIS KIT (8 PARAMETERS) AL-38E

Code: AL-38E GST: 18% Brand: AVAIN LABS

AVAIN LABS® DIGITAL WATER & SOIL ANALYSIS KIT (8 PARAMETERS) AL-38E

The AVAIN LABS® Digital Water & Soil Analysis Kit (8 Parameters) AL-38E is a portable multi-parameter testing kit designed for convenient water and soil analysis in laboratories, educational institutions, field studies, environmental testing, and practical science applications.

The system features a 3½-digit LCD display and combines multiple measurement functions in a convenient briefcase-style portable setup. It is designed to help users evaluate important physical and chemical parameters through a compact, organized testing system.

8-Parameter Analysis

The AVAIN LABS® AL-38E Digital Water & Soil Analysis Kit is designed to cover measurement of:

- pH
- Conductivity
- Turbidity
- Colorimeter
- TDS (Total Dissolved Solids)
- Salinity
- D.O. (Dissolved Oxygen)
- Temperature

The integrated multi-parameter design makes the kit suitable for educational demonstrations and practical water and soil analysis activities.

Key Features

- 8-parameter digital water & soil analysis kit
- 3½-digit LCD display
- Designed for measurement of pH, conductivity, turbidity, colorimetry, TDS, salinity, dissolved oxygen and temperature
- Portable briefcase-style design
- Convenient arrangement for laboratory and field applications
- Suitable for educational and environmental analysis
- Useful for practical demonstrations and science projects
- Multi-parameter testing solution in a single portable kit

Applications

The AVAIN LABS® Digital Water & Soil Analysis Kit is suitable for:

- School and college laboratories
- Environmental science laboratories
- Water quality testing demonstrations
- Soil analysis practicals
- Agricultural education
- Environmental studies
- Field-based educational projects
- Science exhibitions
- Research and teaching applications
- STEM and practical science education

Water & Soil Testing Made Convenient

Water and soil quality can be evaluated using a range of physical and chemical parameters. The AL-38E Digital Water & Soil Analysis Kit brings multiple measurement functions together in one portable system, making it convenient for educational and field-oriented testing activities.

The 3½-digit LCD display provides a straightforward digital readout, while the briefcase configuration makes the equipment convenient to organize, transport, and use at different locations.

Portable Briefcase Design

Available models (3)		
Cat. No.	**Size**	**HSN**
AL-38E-S1	100 g	
AL-38E		
AL-38E-S2	1 kg
