Electrical Kymograph Recording Drum (8 Speed)

Code: W-1104 GST: 18% Brand: AVAIN LABS

AVAIN LABS® Electrical Kymograph Recording Drum (8 Speed)

The AVAIN LABS® Electrical Kymograph Recording Drum (8 Speed) is a precision laboratory instrument designed for recording physiological and pharmacological responses in experimental studies. Widely used in educational institutions, medical colleges, research laboratories, and teaching facilities, this advanced digital kymograph enables accurate graphical recording of muscular contractions and the effects of drugs on contractile tissues.

The instrument consists of a revolving drum that holds kymograph paper while a stylus records movement patterns by moving up and down, creating precise experimental tracings. Equipped with 8 selectable drum speeds, the AVAIN LABS® Electrical Kymograph offers flexible operation for a wide range of physiology and pharmacology experiments.

Users can conveniently select the drum speed using the front-panel control keys, ensuring smooth and accurate recording according to experimental requirements. The start/stop button allows easy operation by instantly controlling the drum movement during experiments.

Manufactured with high-quality components and engineered for reliable laboratory performance, this electrical kymograph is ideal for practical demonstrations, biomedical research, academic training, and scientific experimentation.

Key Features

- Digital Electrical Kymograph Recording Drum

- 8 selectable drum speeds for precise recording
- Smooth and accurate revolving drum operation
- User-friendly front panel controls
- Start/Stop function for easy operation
- Ideal for physiology and pharmacology experiments
- Reliable and durable laboratory design
- Suitable for educational and research institutions
- High-performance recording mechanism
- Stable and efficient operation

Applications

- Physiology Laboratories
- Pharmacology Laboratories
- Medical Colleges
- Research Institutions
- Biomedical Experiments
- Educational Demonstrations
- Scientific Research Applications

Product Specifications

Available models

You are requested to select the appropriate range prior to placing your order.

Specifications

Operating Voltage	AC 230V, 50Hz
Power Consumption	50W
Drum Speeds	0.12mm, 0.25mm, 1.25mm, 2.50mm, 12.5mm, 25.0mm, 320mm, 640mm
Drum Height	153mm
Drum Diameter	153mm
AL-634A	Electrical Kymograph (8 Speed) KNOB TYPE
AL-634B	Electrical Kymograph SLIDING TYPE
AL-634C	Digital Electrical Kymograph (8 Speed)

Available models (3)

Cat. No.	Size	HSN
W-1104-S1	Small	
W-1104		
W-1104-S2	Large
