Extended Shrink – wrapping machine BSB-4020L

Code: BSB-4020L GST: 18% Brand: AVAIN LABS

AVAIN LABS® Extended Shrink – wrapping machine BSB-4020L

The AVAIN LABS® Extended Shrink Wrapping Machine BSB-4020L is a high-performance automatic shrink packaging solution designed for efficient, secure, and professional shrink wrapping applications. Built for commercial and industrial packaging operations, this advanced shrink wrapping machine combines precision sealing with uniform heat shrink technology to deliver clean, durable, and attractive packaging results for a wide variety of products.

Engineered with durable industrial-grade construction and intelligent packaging controls, the BSB-4020L is ideal for food products, beverages, pharmaceuticals, cosmetics, electronics, stationery, household items, and retail packaging. The extended chamber design allows packaging of longer and larger products while ensuring smooth and continuous shrink wrapping performance.

The machine is compatible with PVC, POF, and shrink films, providing strong and tamper-resistant packaging that protects products from dust, moisture, and transportation damage. With adjustable temperature and conveyor speed settings, the AVAIN LABS® BSB-4020L offers precise control and efficient packaging for different product sizes and film materials.

Key Features

- Automatic shrink wrapping and sealing system
- Extended chamber design for larger product packaging
- Uniform heat distribution for perfect shrink wrapping
- Adjustable temperature and conveyor speed controls
- Durable industrial-grade construction
- Compatible with PVC, POF, and shrink films
- Smooth, tight, and professional packaging finish
- Continuous operation for commercial production lines
- Energy-efficient heating system
- Easy operation and low maintenance design

Applications

The AVAIN LABS® Extended Shrink Wrapping Machine BSB-4020L is ideal for packaging:

- Food and beverage products
- Bottles, cartons, and containers
- Cosmetics and pharmaceutical products
- Books and stationery items
- Electronic products and accessories
- Household and retail products

Benefits of Shrink Wrapping

Shrink packaging helps:

- Improve product presentation and shelf appeal
- Protect products from dust, moisture, and damage
- Enhance tamper resistance and packaging security
- Reduce movement during transportation
- Create professional retail-ready packaging

Why Choose AVAIN LABS® Extended Shrink Wrapping Machine BSB-4020L?

Designed for businesses that require reliable and high-speed packaging solutions, the BSB-4020L delivers excellent shrink wrapping performance, durable construction, and efficient operation for demanding industrial packaging environments. Its extended wrapping capability makes it ideal for larger and longer packaged products.

Upgrade your packaging operations with the AVAIN LABS® Extended Shrink Wrapping Machine BSB-4020L — the ideal solution for automatic shrink wrapping, industrial packaging, and professional heat shrink sealing applications.

Specifications

Model No	BSB-4020L
Power	10Kw
Voltage	220-380v – 50-60Hz
Conveying Speed	0 – 15 m-Min
Furnace channel	1200 x 400 x 200mm
Applicate Film	PVC-POF
Item Weight	110Kg
Outer Dimensions	1690 x 690 x 800mm

Available models (3)

Cat. No.	Size	HSN
BSB-4020L-S1	Small	
BSB-4020L		
BSB-4020L-S2	Large
