GLYCEROL Extra Pure 00155

Code: 00155 GST: 18% Brand: AVAIN LABS

- ???????? humectant and moisturizing properties
- Highly soluble in water and alcohol
- Suitable for laboratory, pharmaceutical, and industrial use

Common Applications:

- Laboratory reagent and chemical analysis
- Pharmaceutical and medical formulations
- Cosmetics and personal care products
- Food and beverage processing (as per applicable standards)
- Chemical synthesis and industrial applications

GLYCEROL Extra Pure 00155

Glycerol Extra Pure (00155), also known as glycerin, is a high-quality, colorless, odorless, and viscous liquid widely used in laboratory, pharmaceutical, cosmetic, and industrial applications. Manufactured to extra pure grade standards, this product ensures high chemical purity, low impurities, and consistent performance for precise and reliable results.

With its excellent moisturizing, humectant, and solvent properties, glycerol is commonly used in pharmaceutical formulations, personal care products, food processing (approved grades), and chemical synthesis. It is also widely utilized in laboratory experiments, buffer preparation, and as a stabilizing agent in various formulations.

Glycerol Extra Pure is highly soluble in water and alcohol, making it an essential ingredient in cosmetics, syrups, creams, and industrial processes where moisture retention and smooth consistency are required.

Key Features:

- Extra Pure Grade with high purity levels
- Colorless, odorless, and viscous liquid
