HUMAN SKELTON LIFE SIZE (180CM) with stand (IMPORTED) AL-101

Code: AL-101 GST: 18% Brand: AVAIN LABS

AVAIN LABS® HUMAN SKELTON LIFE SIZE (180CM) with stand (IMPORTED) AL-101

The AVAIN LABS® Human Skeleton Life Size (180cm) with Stand (Imported) AL-101 is a premium quality anatomical teaching model designed for medical education, nursing training, biology studies, and clinical demonstrations. This life-size articulated adult human skeleton model accurately represents the structure and arrangement of human bones, making it an ideal educational aid for schools, colleges, universities, hospitals, and medical institutions.

Manufactured from high-quality washable and unbreakable PVC plastic, the skeleton offers exceptional durability and long service life, even with regular classroom and laboratory use. Standing at an impressive 180 cm height, this full-size anatomical model provides realistic proportions for detailed study and demonstration of the human skeletal system.

The model features a fully articulated design, allowing natural movement and positioning of joints for enhanced learning and demonstration purposes. For detailed anatomical study, the arms and legs are removable, enabling students and educators to closely examine individual bones and joint structures.

Mounted on a sturdy stand for easy display and mobility, the AL-101 skeleton model is widely used for teaching anatomy, physiology, orthopedics, and medical sciences. Its realistic construction makes it suitable for both classroom instruction and professional healthcare training environments.

Equivalent to Model No. XC-101, the AVAIN LABS® Human Skeleton AL-101 combines durability, accuracy, and educational value, making it an essential teaching tool for anatomy education.

Key Features

- Life-size adult human skeleton model measuring 180 cm in height.
- Fully articulated design for realistic movement and anatomical demonstration.
- Manufactured from washable and unbreakable PVC plastic for long-lasting durability.
- Removable arms and legs for detailed study of bones and joints.
- Mounted on a sturdy stand for easy display and classroom use.
- Highly detailed anatomical representation of the human skeletal system.
- Ideal for anatomy, physiology, orthopedics, and medical education.
- Suitable for repeated use in educational and professional environments.
- Equivalent to Model No. XC-101.

Applications

- Human anatomy teaching
- Medical and nursing education
- Biology laboratory demonstrations
- Orthopedic and physiotherapy training
- Clinical and healthcare education
- Classroom and institutional teaching aids

Ideal For

- Schools and educational institutions
- Medical colleges and universities
- Nursing colleges
- Hospitals and healthcare training centers
- Biology and anatomy laboratories
- Research and educational facilities

The AVAIN LABS® Human Skeleton Life Size (180cm) with Stand (Imported) AL-101 is the perfect anatomical model for educators and healthcare professionals seeking a durable, realistic, and professional teaching aid for human anatomy studies.
