Internal Circulation Shrink Wrapping BSN-4522

Code: BSN-4522 GST: 18% Brand: AVAIN LABS

AVAIN LABS® Internal Circulation Shrink Wrapping BSN-4522

The AVAIN LABS® Internal Circulation Shrink Wrapping BSN-4522 is a high-efficiency industrial shrink packaging machine designed for fast, uniform, and professional shrink wrapping applications. Built with advanced internal hot air circulation technology, this shrink wrapping machine delivers consistent heat distribution for smooth, tight, and secure shrink packaging results across a wide range of products.

Engineered for commercial and industrial packaging environments, the BSN-4522 is ideal for packaging food products, beverages, cosmetics, pharmaceuticals, electronics, stationery, toys, boxes, bottles, and retail products. The internal circulation heating system ensures even shrink performance while improving energy efficiency and reducing heat loss during operation.

Designed with durable industrial-grade construction and user-friendly controls, the AVAIN LABS® BSN-4522 offers adjustable temperature and conveyor speed settings to support different packaging materials and product sizes. Compatible with PVC, POF, and shrink films, the machine creates attractive, tamper-resistant, and protective packaging for enhanced product presentation and transportation safety.

Key Features

- Advanced internal hot air circulation shrink system
- Uniform heat distribution for perfect shrink wrapping
- Adjustable temperature and conveyor speed controls
- Durable industrial-grade construction
- Compatible with PVC, POF, and shrink films
- Smooth, tight, and professional shrink packaging finish
- Energy-efficient heating performance
- Continuous operation for industrial packaging lines
- Easy operation and low maintenance design
- Suitable for various product sizes and packaging applications

Applications

The AVAIN LABS® Internal Circulation Shrink Wrapping BSN-4522 is ideal for packaging:

- Food and beverage products
- Bottles, jars, and containers
- Cosmetics and pharmaceutical products
- Books and stationery items
- Electronics and accessories
- Retail and industrial products

Benefits of Internal Circulation Shrink Wrapping

Shrink wrapping helps:

- Improve product presentation and shelf appeal
- Protect products from dust, moisture, and damage
- Enhance packaging security and tamper resistance
- Reduce movement during storage and transportation
- Deliver professional retail-ready packaging

Why Choose AVAIN LABS® Internal Circulation Shrink Wrapping BSN-4522?

Designed for businesses that require reliable and efficient shrink packaging solutions, the BSN-4522 combines advanced internal circulation heating technology, durable construction, and high-performance operation to deliver consistent and professional shrink wrapping results for commercial and industrial packaging environments.

Upgrade your packaging operations with the AVAIN LABS® Internal Circulation Shrink Wrapping BSN-4522 — the ideal solution for industrial shrink wrapping, heat tunnel packaging, and high-efficiency shrink sealing applications.

Specifications

Model No	BSN-4522
Power	15Kw
Voltage	220-380v-50-60Hz
Tunnel Size	1500 x 450 x 220mm
Conveying Speed	0-15 m-Min
Transport Load	20Kg
Applicate Film	PVC-POF
Item Weight	200Kg
Machine Dimension	1900 x 710 x 1260mm
Outer package size	2000 x 810 x 1480mm

Available models (3)

Cat. No.	Size	HSN
BSN-4522-S1	Small	
BSN-4522		
BSN-4522-S2	Large
