Jumbo Tuning Fork Set

Code: W-2530 GST: 18% Brand: AVAIN LABS

AVAIN LABS® Jumbo Tuning Fork Set

The AVAIN LABS® Jumbo Tuning Fork Set is a premium-quality stainless steel tuning fork set designed for sound resonance demonstrations, vibration therapy, educational experiments, physics laboratories, wellness applications, and professional training. Precision engineered from high-grade stainless steel, this set delivers exceptional durability, corrosion resistance, and long-lasting acoustic performance.

The set includes multiple jumbo-sized tuning forks and resonance accessories, making it ideal for schools, colleges, universities, research laboratories, physics departments, sound therapy practitioners, meditation centers, and scientific demonstrations. Its oversized design ensures excellent visibility during classroom teaching and group demonstrations while producing strong, clear, and sustained vibrations.

Manufactured from premium stainless steel, the tuning forks feature a mirror-polished finish that offers excellent resistance to rust, corrosion, and daily wear. The robust construction ensures consistent resonance and reliable performance, making the set suitable for both professional laboratory use and educational environments.

Each tuning fork is carefully machined for precision, providing accurate vibration characteristics for resonance experiments, acoustics demonstrations, sound therapy, meditation practices, music education, and scientific research. The ergonomic design allows for comfortable handling and repeated use without compromising performance.

Whether you're conducting physics experiments, resonance studies, vibration demonstrations, educational training, wellness sessions, or professional laboratory work, the AVAIN LABS® Jumbo Stainless Steel Tuning Fork Set offers exceptional quality, durability, and precision.

Key Features

- Manufactured from premium-grade stainless steel for superior durability and corrosion resistance.
- Produces clear, strong, and long-lasting sound vibrations.
- Mirror-polished finish for a professional appearance and easy cleaning.
- Heavy-duty construction designed for long-term laboratory and educational use.
- Jumbo size provides excellent visibility during classroom demonstrations.
- Precision-engineered for consistent resonance and accurate performance.
- Comfortable ergonomic design for easy handling.
- Suitable for educational, laboratory, research, and wellness applications.
- Ideal for physics laboratories, acoustics experiments, sound therapy, vibration therapy, meditation, music education, STEM learning, and scientific demonstrations.
- Trusted quality from AVAIN LABS®, a leading manufacturer of scientific, laboratory, and educational equipment.

Applications

- Physics Laboratories
- Acoustics & Resonance Experiments
- Educational Institutions
- Schools & Universities
- Research Laboratories
- STEM Education
- Sound Therapy & Vibration Therapy
- Meditation & Wellness Centers
- Scientific Demonstrations
- Professional Training

The AVAIN LABS® Jumbo Stainless Steel Tuning Fork Set combines precision engineering, premium stainless steel construction, exceptional durability, and professional-grade performance, making it the ideal choice for educators, researchers, therapists, laboratories, and institutions seeking reliable tuning forks for scientific, educational, and therapeutic applications.

Available models (3)		
Cat. No.	**Size**	**HSN**
W-2530-S1	Small	
W-2530		
W-2530-S2	Large
