MICROPROCESSOR DISSOLVED OXYGEN METER AL-36A

Code: AL-36A GST: 18% Brand: AVAIN LABS

- Fast, stable, and highly accurate measurements
- User-friendly keypad and intuitive operation
- Rugged construction for laboratory and field applications
- Reliable performance with minimal maintenance

Applications

- Water Quality Testing Laboratories
- Environmental Monitoring
- Wastewater Treatment Plants
- Drinking Water Analysis
- Aquaculture & Fisheries
- Pharmaceutical Laboratories
- Research & Development Laboratories
- Universities & Educational Institutions
- Food & Beverage Industry
- Industrial Water Process Monitoring

Technical Highlights

- Model: AL-36A
- Display: 16×2 Alphanumeric LCD
- Measurement: Dissolved Oxygen & Temperature
- Memory Capacity: Up to 1000 Samples
- Data Interface: USB Computer Connectivity
- Technology: Microprocessor Controlled

Standard Accessories

- Dissolved Oxygen (D.O.) Probe
- Temperature Probe
- Electrode Cover
- Instruction Manual

Why Choose AVAIN LABS®?

AVAIN LABS® MICROPROCESSOR DISSOLVED OXYGEN METER AL-36A

The AVAIN LABS® Microprocessor Dissolved Oxygen Meter AL-36A is a high-precision laboratory instrument engineered for accurate measurement of Dissolved Oxygen (DO) and temperature in water samples. Designed with advanced microprocessor technology, this meter delivers reliable, fast, and repeatable results, making it ideal for water quality testing, environmental monitoring, research laboratories, wastewater treatment plants, aquaculture, pharmaceutical laboratories, educational institutions, and industrial process control.

Featuring a 16×2 alphanumeric LCD display, the AL-36A simultaneously displays Dissolved Oxygen (DO) and temperature, allowing users to monitor both parameters in real time. The instrument includes an internal memory capable of storing up to 1000 sample records and supports USB computer connectivity for convenient data transfer, documentation, and analysis.

Supplied with a high-quality D.O. probe, temperature probe, electrode cover, and instruction manual, the AVAIN LABS® AL-36A offers a complete solution for professional dissolved oxygen measurement.

Key Features

- Advanced microprocessor-based Dissolved Oxygen Meter
- Large 16×2 alphanumeric LCD display
- Simultaneous display of Dissolved Oxygen (DO) and Temperature
- Internal memory for up to 1000 sample records
- USB computer interface for data transfer and analysis
