NEEDLE SYRINGE DESTROYER

Code: AL-ME060 HSN: 9027 GST: 18% Brand: AVAIN LABS

AVAIN LABS® NEEDLE SYRINGE DESTROYER

The AVAIN LABS® Needle Syringe Destroyer is a reliable and efficient biomedical waste management device designed for the safe destruction of used syringe needles and disposal of medical sharps. Widely used in hospitals, clinics, laboratories, nursing homes, diagnostic centers, and healthcare facilities, this device helps prevent needle-stick injuries and minimizes the risk of infection and contamination.

Manufactured with durable materials and user-friendly functionality, the AVAIN LABS® Needle Syringe Destroyer ensures quick and safe operation for healthcare professionals. The device is designed to safely cut, burn, or destroy syringe needles, making disposal safer and more hygienic while supporting biomedical waste management standards.

Compact, portable, and easy to operate, this needle destroyer is ideal for routine medical use and infection control applications. Its robust construction and dependable performance make it an essential safety device for modern healthcare environments.

Key Features

- Safe and efficient Needle & Syringe Destruction
- Helps prevent Needle-Stick Injuries
- Supports proper Biomedical Waste Management
- Compact and durable design
- Easy-to-use and low maintenance
- Suitable for continuous medical use
- Hygienic and reliable operation
- Ideal for hospitals, clinics, and laboratories
- Portable and space-saving construction

Technical Specifications

- Brand: AVAIN LABS®
- Product Type: Needle Syringe Destroyer
- Application: Needle & Syringe Disposal
- Operation: Safe and Easy Handling
- Design: Compact & Durable

Applications

- Hospitals & Healthcare Centers
- Diagnostic Laboratories
- Clinics & Nursing Homes
- Medical Colleges
- Pathology Laboratories
- Vaccination & Healthcare Camps
- Biomedical Waste Disposal Applications

The AVAIN LABS® Needle Syringe Destroyer provides a safe, hygienic, and effective solution for medical sharps disposal, helping healthcare professionals maintain safety and infection control standards in clinical environments.
