Ointment Slab

Code: AL-686 GST: 18% Brand: AVAIN LABS

AVAIN LABS® Ointment Slab

The AVAIN LABS® Ointment Slab is a high-quality laboratory tool designed for the preparation, mixing, and compounding of ointments, creams, and pharmaceutical formulations. Widely used in pharmacies, laboratories, and research institutions, this slab provides a smooth and stable surface for efficient and hygienic formulation work.

Manufactured with premium-grade material (typically glass/porcelain/stone depending on variant), the ointment slab offers a non-porous, chemical-resistant surface that prevents contamination and ensures easy cleaning after use. Its flat, polished finish allows uniform mixing and spreading, helping achieve consistent results in pharmaceutical preparations.

Designed for durability and convenience, the slab is sturdy, easy to maintain, and resistant to stains and chemicals, making it ideal for daily use in professional environments. Whether for pharmaceutical compounding, cosmetic preparation, or laboratory applications, the AVAIN LABS ointment slab delivers reliable performance and long-lasting quality.

? Key Features

- Smooth Polished Surface – Ensures uniform mixing and easy spreading
- Chemical Resistant – Suitable for various pharmaceutical formulations
- Non-Porous Material – Prevents absorption and contamination
- Easy to Clean & Maintain – Supports hygienic operation
- Durable & Long-Lasting – Built for continuous professional use
- Stable & Flat Design – Provides a reliable working surface
