Plethysmograph AL-688

Code: AL-688 GST: 18% Brand: AVAIN LABS

AVAIN LABS® Plethysmograph AL-688

The AVAIN LABS® Plethysmograph AL-688 is a highly accurate laboratory instrument designed for measuring changes in volume, commonly used in pharmacological and physiological research. This advanced device is ideal for edema measurement, anti-inflammatory drug studies, and vascular research, making it an essential tool in pharmaceutical laboratories, research institutes, and academic settings.

Engineered for precision and reliability, the AL-688 Plethysmograph enables researchers to assess minute changes in limb or paw volume with high sensitivity. It plays a critical role in evaluating the effectiveness of anti-inflammatory and analgesic compounds by providing consistent and reproducible results.

The instrument features a user-friendly interface, robust construction, and stable performance, ensuring long-term usability in demanding laboratory environments. Its compact design and easy operation make it suitable for routine laboratory applications as well as advanced research studies.

Key Features:

- Accurate measurement of volume changes for research applications
- Ideal for edema studies and anti-inflammatory drug evaluation
- High sensitivity for precise and repeatable results
- Suitable for pharmacology, physiology, and biomedical research
- Durable construction for long-term laboratory use
- Easy to operate and maintain

The AVAIN LABS® Plethysmograph AL-688 is a reliable and efficient solution for researchers seeking precise volume measurement and consistent experimental outcomes.

Available models (5)

Cat. No.	Model / Size	HSN
AL-687	304) 120mm Dia	
AL-688	s	
AL-689	Plethysmograph AL-688	
AL-790	Plethysmograph AL-688	
AL-791	Plethysmograph AL-688
