Pulverizer AL-793A

Code: AL-793A GST: 18% Brand: AVAIN LABS

AVAIN LABS® Pulverizer AL-793A

The AVAIN LABS® Pulverizer AL-793A is a robust and efficient grinding machine designed for fast and uniform pulverizing of grains, pulses, spices, seeds, herbs, chemicals, and various dry materials. Built for continuous operation and high productivity, this machine is ideal for laboratories, food processing units, agricultural applications, research institutions, and small-scale industrial production.

Powered by a high-performance 2 HP electric motor, the Pulverizer AL-793A delivers reliable and consistent grinding performance with excellent output capacity and energy efficiency. The machine is equipped with 8–10 interchangeable sieves, allowing users to achieve different particle sizes and powder fineness according to application requirements.

The machine features a sturdy Mild Steel (MS) outer body for durability and long service life, while the top hopper is manufactured from high-quality Stainless Steel (SS) to ensure hygienic material handling and resistance to corrosion.

Designed with a compact yet heavy-duty construction, the pulverizer has an approximate weight of 60–70 kg, providing excellent stability during operation and reducing vibration for smoother performance.

For user convenience and maintenance, the machine is supplied with essential accessories including a cleaning brush for easy cleaning of grinding chambers and sieves, and a wire cord for quick installation and operation.

Key Features

- High-performance 2 HP Motor for powerful and efficient grinding.
- Supplied with 8–10 sieves for multiple particle size options.
- Durable Mild Steel (MS) outer body construction.
- Hygienic and corrosion-resistant Stainless Steel (SS) top hopper.
- Suitable for grinding grains, spices, herbs, seeds, pulses, and dry materials.
- Approximate machine weight of 60–70 kg for improved stability.
- Compact design suitable for laboratories and industrial applications.
- Includes cleaning brush for easy maintenance.
- Supplied with wire cord for convenient installation and operation.
- Designed for continuous and reliable performance.

Applications

- Food Processing Industries
- Spice Grinding Units
- Agricultural Processing
- Pharmaceutical Laboratories
- Chemical Laboratories
- Research and Development Centers
- Educational Institutions
- Small and Medium Scale Industries

The AVAIN LABS® Pulverizer AL-793A combines powerful performance, durable construction, and operational flexibility, making it an ideal solution for laboratories and industries requiring efficient and consistent grinding results.
