Tablet Disintegration Without Water Bath

Code: W-930 GST: 18% Brand: AVAIN LABS

AVAIN LABS® Tablet Disintegration Without Water Bath

The AVAIN LABS® Tablet Disintegration Test Apparatus (Without Water Bath) is a reliable and space-saving laboratory instrument designed to determine the disintegration time of tablets and capsules under standardized conditions. Ideal for pharmaceutical quality control labs, research facilities, and educational institutions, this apparatus ensures accurate and repeatable testing results.

This model is designed without an integrated water bath, allowing flexibility to use an external heating system or water source as per laboratory requirements. It features a precision-driven motor mechanism that ensures consistent up-and-down movement of the basket assembly, simulating real-life conditions for tablet disintegration.

Built with high-quality materials and a durable structure, the AVAIN LABS® disintegration tester offers long-lasting performance and minimal maintenance. Its user-friendly design makes it easy to operate, while the compact footprint makes it suitable for labs with limited space.

Key Features:

- Accurate testing of tablet and capsule disintegration time
- Compact design without built-in water bath for flexible use
- Consistent basket movement for reliable results
- Suitable for pharmaceutical QC, R&D, and academic labs
- Durable construction with low maintenance
- Easy to operate and user-friendly

Choose the AVAIN LABS® Tablet Disintegration Test Apparatus (Without Water Bath) for precise, efficient, and cost-effective tablet testing in your laboratory.
