Slide Warming Table

Code: W-2742 GST: 18% Brand: AVAIN LABS

AVAIN LABS® Slide Warming Table

AVAIN LABS® Slide Warming Table is a reliable laboratory heating equipment designed for microscope slide warming, sample preparation, pathology laboratories, histology laboratories, medical laboratories, research facilities, and educational institutions. It provides controlled and uniform heating of microscope slides and laboratory samples, helping maintain the required temperature during laboratory procedures.

The Slide Warming Table is manufactured with a durable mild steel powder-coated outer body and a choice of Aluminium or Stainless-Steel top, offering a practical and easy-to-maintain working surface. The unit is designed to provide temperatures up to 80°C and can be supplied with either a precision thermostat or a microprocessor-based PID digital temperature indicator-cum-controller, according to customer requirements.

Key Features & Specifications

- Brand: AVAIN LABS®
- Product: Slide Warming Table
- Outer Body: Mild Steel, Powder Coated
- Top: Aluminium or Stainless Steel
- Temperature Range: Up to 80°C
- Temperature Control: Precision Thermostat or Microprocessor-Based PID Digital Temperature Indicator-cum-Controller
- Temperature Accuracy: ±2°C
- Heating Element: Insulated Kanthal Element
- Heating: Uniform heating through elements positioned underneath the working top
- Power Supply: 220–230 Volt AC, 50 Hz
- Configuration: Available as per customer requirement

Uniform & Controlled Heating

The AVAIN LABS® Slide Warming Table uses insulated Kanthal heating elements placed underneath the top surface to provide uniform heating across the working area. The temperature can be controlled using a precision thermostat or a microprocessor-based PID digital temperature controller, depending on the selected configuration.

Applications

The Slide Warming Table is suitable for:

- Pathology laboratories
- Histology laboratories
- Medical laboratories
- Microbiology laboratories
- Research laboratories
- Microscope slide preparation
- Slide warming and drying
- Medical and laboratory education
- Hospitals and diagnostic centers
- Pharmaceutical and research institutions

Customizable as Per Requirement

AVAIN LABS® offers the Slide Warming Table with temperature-control options and top-material choices to meet different laboratory requirements. Customers can select an Aluminium or Stainless-Steel top and choose between a precision thermostat or PID digital temperature indicator-cum-controller.

Why Choose AVAIN LABS® Slide Warming Table?

Designed for laboratory environments, the AVAIN LABS® Slide Warming Table combines durable construction, controlled temperature regulation, and uniform heating in a practical laboratory unit. It is an ideal choice for institutions requiring dependable equipment for slide warming, slide preparation, and laboratory heating applications.
