Water Still Distillation Manasty type

Code: AL-526 HSN: 84194020 GST: 18% Brand: AVAIN LABS

AVAIN LABS® Water Still Distillation Manasty type

The AVAIN LABS® Water Still Distillation Manasty Type is a high-quality laboratory water distillation unit designed for producing pure and distilled water for scientific, medical, and industrial applications. Manufactured using durable and corrosion-resistant materials, this laboratory-grade water still ensures reliable performance, efficient distillation, and long service life.

Designed for continuous laboratory operation, the unit efficiently removes impurities, dissolved salts, and contaminants from water, delivering high-purity distilled water suitable for analytical, research, and testing applications. Its robust construction and user-friendly design make it ideal for laboratories, hospitals, educational institutions, pharmaceutical industries, and research facilities.

The Manasty Type Water Still is engineered for efficient heating and condensation, ensuring consistent distilled water output with low maintenance requirements. Its compact and durable design provides dependable performance for routine laboratory use.

Key Features

- High-efficiency Water Distillation Unit
- Produces pure and high-quality distilled water
- Durable and corrosion-resistant construction
- Reliable and continuous laboratory operation
- Efficient heating and condensation system
- Easy installation and low maintenance
- Suitable for laboratory and industrial applications
- Compact and sturdy design
- Long operational life with dependable performance

Technical Specifications

- Brand: AVAIN LABS®
- Product Type: Water Still Distillation Unit
- Model Type: Manasty Type
- Application: Distilled Water Production
- Construction: Heavy-Duty Laboratory Design
- Operation: Continuous Distillation Process

Applications

- Chemical Laboratories
- Pharmaceutical Industries
- Research & Development Centers
- Hospitals & Medical Laboratories
- Educational Institutions
- Industrial Testing Laboratories
- Scientific & Analytical Applications

The AVAIN LABS® Water Still Distillation Manasty Type offers efficient, reliable, and high-purity water distillation, making it an essential laboratory instrument for professional scientific and industrial use.

Available models

Specifications	
Cat No	Output Capacity (Approx) | Body Material

Available models (8)

Cat. No.	Output Capacity (Approx)	Body Material	HSN
AL-526A1	Output approx.2 to 3 Liter per hr.	SS Body	84194020
AL-526A2	Output approx.2 to 3 Liter per hr.	Low Water Cutoff Device	84194020
AL-526B1	Output approx.3 to 4 Liter per hr.	SS Body	84194020
AL-526B2	Output approx.3 to 4 Liter per hr.	Low Water Cutoff Device	84194020
AL-526C1	Output approx.5 to 6 Liter per hr.	SS Body	84194020
AL-526C2	Output approx.5 to 6 Liter per hr.	Low Water Cutoff Device	84194020
AL-526D1	Output approx.9 to10 Liter per hr.	SS Body	84194020
AL-526D2	Output approx.9 to10 Liter per hr.	Low Water Cutoff Device	84194020
